Dear Community Member,

The Department of Toxic Substances Control (DTSC) has prepared this community survey to gather information as part of our public outreach program. DTSC has issued a Remedial Action Order (Order) for environmental cleanup activities at the Fulton Shipyard property (Site) located at 307 Fulton Shipyard Road, Anitoch, California. DTSC will be overseeing further investigation and cleanup activities at this Site. Your response to this survey will help DTSC assess community interest and conduct future community outreach activities. Please return this survey to Nancy Cook, DTSC Public Participation Specialist, by June 30, 2006.

Below is a description of the Site and future environmental activities:

Fulton Shipyard: Environmental investigations conducted at this Site found lead, petroleum hydrocarbons, and volatile organic compounds in the soil. Metals, including lead and mercury, were detected in San Joaquin River sediments in the vicinity of the marine railway. The contamination is likely associated with former ship building and maintenance operations at the Site. DTSC has determined that further investigation is necessary to develop a cleanup plan. The Site is being cleaned up for future redevelopment. A fact sheet will be mailed to the community once a draft cleanup plan is developed for public review. For additional information about environmental activities at Fulton Shipyard, please contact Ryan Miya, DTSC Project Manager, at (510) 540-3775 or email him at rmiya@dtsc.ca.gov.

For further information about public participation, please contact Nancy Cook, DTSC Public Participation Specialist, at (510) 540-3923 or email her at ncook@dtsc.ca.gov. For media questions, please contact Angela Blanchette, DTSC Public Information Officer, at (510) 540-3732 or email her at ablanch@dtsc.ca.gov.

Sincerely,

Nancy Cook
DTSC Public Participation Specialist
